ABOUT ME

I have experience in data analysis, QA, and software development. I work with modern technologies and agile methodologies such as Scrum. I'm focused on continuous improvement and learning, and on delivering efficient solutions. I stand out for my ability to work in teams, communicate effectively, and solve problems proactively.

EDUCATION

-  **Associate Degree in Software Development** – Universidad Argentina de la Empresa (March 2021 – April 2024)
-  **Bilingual High School Diploma in Social Sciences** – Colegio Secundario CIERG (March 2014 – December 2020)

CERTIFICATIONS

-  First Certificate Exam.
-  IGCSE Cambridge.

IDIOMAS

-  Spanish – Native
-  English – Advanced

EXPERIENCE

SQL Data Analyst – VML · Client: Microsoft

May 2025 – Present

- Develop and optimize advanced SQL Server queries to extract and transform accurate data, automating processes.
- Design SQL statements for data insertion, updates, and retrieval based on requirements.
- Interpret and analyze requests to deliver effective technical solutions.
- Collaborate with cross-functional teams to ensure data quality and accuracy.

QA/Data Entry Analyst – VML · Client: Microsoft

August 2024 – Present

- Execute functional, regression, integration, and acceptance tests on websites, documents, and banners.
- Log and track defects, working closely with teams to ensure resolution.
- Ensure product quality by working with copywriters, product managers, and developers.
- Contribute to continuous improvement in testing processes to enhance early error detection and software quality.

Freelance Developer - March 2024 – August 2024

- Worked on various web development projects using multiple technologies to deliver effective solutions.
- Designed and delivered customized, intuitive, and visually appealing applications, collaborating closely with clients to meet goals and requirements.

TECHNICAL SKILLS

- Java – Spring Boot – REST APIs.
- HTML & CSS – Bootstrap – JavaScript – React.
- Relational Databases (SQL Server) and NoSQL (MongoDB, Redis).
- Version control with Git and GitHub.
- Wireframing, prototyping, and UI/UX design with Figma
- Development tools: Postman, VS Code, IntelliJ IDEA.
- Functional and regression testing.
- Adobe Experience Manager.

INTERPERSONAL SKILLS

- Clear and effective communication in both Spanish and English, within local and international teams.
- Smooth collaboration with both technical and non-technical profiles, adapting to different work environments.
- Analytical and results-oriented mindset.
